The fleet will be interested in an order issued by the Department yesterday, and which directs that navy officers will have to take the prescribed walking test more often than in the past. Under the new order, all officers not physically incepacitated will be required to walk ten miles in one day, once a month. They must arrange their time so as to consume not less than three and one-half nor more than four hours in the test, except in tropical elimates, when the distance and time will be two-thirds of the above.

Under the old order the men were required to walk twenty-five miles in two days once every three months.

pertioned figure which attracts not only friendship, but love and adulation as well.

People with a proper amount of flesh are favored in all walks of life, while the thin are unblessed, unwelcome and frequently miserable for life. The difference lies in the power of the digestive functions and the ability of the blood and nerves to absorb and distribute over the body like nutrition extracted from the load eaten.

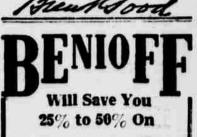

The thin person is abnormal and lacks the power to absorb and retain the flesh and far elements which the gastric juices in the stomach and intestines should extract or separate from all kinds of food and drink.
